Nagios XI - Monitoring Windows With WMI

Monitoring Windows With WMI

WMI (Windows Management Instrumentation) allows for agentless monitoring of Windows machines. Nagios XI supports WMI monitoring, which provides admins with a simple method of monitoring their Windows servers and workstations without having to install or configure agents. This document describes how to monitor Windows machines with Nagios XI using WMI.

Documentation - Monitoring Windows With WMI

Watch this video to learn how to use the power of WMI in Nagios XI to monitor your entire Windows deployment.

Final Thoughts
