

Nagios Fusion - Multi-Tenancy

Article Number: 129 | Rating: Unrated | Last Updated: Mon, Jul 17, 2017 at 6:11 PM

Problem Description

Nagios Fusion is connected to a Nagios XI server and that XI server has multi-tenancy implemented. Users that are logged into Fusion can see hosts and services that they cannot normally see when logged onto XI.

Explanation

Versions Prior To Nagios Fusion 4

Multi-tenancy was not incorporated into Nagios Fusion. Even though you can set up the server's credentials for a "read-only" user, under the Fusion Tactical Overview, you will be able to see the info that admins see.

Nagios Fusion 4

Multi-tenancy has been incorporated, for more detailed information please refer to the following documentation:

[Documentation - Managing Fusion Users](#)

Final Thoughts
