

Pages Not Displaying Correctly

Article Number: 142 | Rating: Unrated | Last Updated: Wed, Feb 10, 2016 at 7:55 PM

Problem Description

The Nagios application is not displaying the correct information. This commonly occurs after applying an update to the Nagios program.

Explanation

Your web browsers cache has not been refreshed with the latest code since the update was applied to the Nagios product.

Here is a article that explains the problem in detail:

[Wikipedia: Bypass your cache](#)

Resolving The Problem

In most web browsers, Pressing **CTRL + F5** on your keyboard causes the web page to load directly instead of using the local cache. This will also update the local cache as the page is loaded.

Final Thoughts

For any support related questions please visit the [Nagios Support Forums](#) at:
