

Nagios XI - Configuring Global Event Handlers

Article Number: 187 | Rating: 5/5 from 1 votes | Last Updated: Wed, Feb 17, 2016 at 7:43 PM

Configuring Global Event Handlers

This document describes how to configure Nagios® XI™ to run global event handler scripts in order to process host and service state changes, alerts, and notification information. Global event handlers allow admins to run custom-developed scripts with Nagios XI in order to create custom automation processes.
