

Nagios XI - Business Process Integration

Article Number: 227 | Rating: 1/5 from 1 votes | Last Updated: Thu, Feb 18, 2016 at 12:49 AM

Business Process Integration

This document describes how to install the community-developed Business Process Addons with Nagios XI. Business Process Addons are comprised of two addons - Business Process View and Business Impact Analysis. These addons are useful for showing the high-level status of critical business processes within an organization, and determining the impact of outages using simulated failures, by combining Nagios objects into logical groups from a business impact perspective.
