Monitoring Hosts Using NRPE and NRPE Monitoring Wizard

This document describes how to monitor hosts with Nagios XI by using NRPE and NRPE Monitoring Wizard. This document is intended for use by Nagios XI Administrators who want to setup custom monitoring of servers using NRPE or who have existing hosts with the NRPE agent already installed and configured. This is especially useful to administrators who are migrating from Nagios Core to Nagios XI and are already monitoring Linux/Unix machines using NRPE.
