

Nagios XI - Monitoring Unconfigured Objects

Article Number: 253 | Rating: 1/5 from 2 votes | Last Updated: Tue, Feb 9, 2016 at 10:32 PM

Monitoring Unconfigured Objects

Passive check results for hosts and services that are submitted to Nagios by external agents and application using the NSCA or NRDP APIs are not processed by the monitoring engine until they are configured in Nagios XI. This document describes how to configure monitoring of previously unconfigured hosts and services that a Nagios XI server has received passive check results for.
