

Nagios XI - Understanding And Using Dashboards

Article Number: 272 | Rating: Unrated | Last Updated: Tue, Mar 12, 2019 at 4:33 PM

Understanding And Using Dashboards

This document describes Nagios® XI™ dashboards, what they can be used for, and how they can be managed. Dashboards are a powerful feature of Nagios XI designed to provide individual users with customized information that's relevant to their environment.

This video provides a basic understanding and utilization of Dashboards and to a lesser degree, dashlets in Nagios XI.

Adding Dashlets to Dashboards in Nagios XI is fast and easy. You can customize your homepage any way you like. Multiple homepages can be created for different users allowing them to see precisely what they want and need to see.

This video will demonstrate the advantages and how to deploy dashboards to other users in Nagios XI.

Dashboarding is easy in Nagios XI, even for screens that don't include the blue dashify button! Aaron shows you how, and reveals two interface hacks to customize service status dashboards.

Final Thoughts
