

Nagios XI - NSP: Sorry Dave, I can't let you do that

Article Number: 33 | Rating: 1/5 from 1 votes | Last Updated: Mon, Feb 22, 2016 at 7:06 PM

Overview

Session protection was added to 2009R1.2C to prevent CSRF attacks. This code to do this caused some users to see this error. The problem was due to the user's browser caching older versions of the XI javascript code. In order to clear the cache and prevent this from happening, you need to clear your browser's cache. This is typically done (in Firefox) by holding down the shift key and clicking reload.

Another possible cause is that the server's time is out of sync with that of the browser. A detailed document that explains all the settings performed can be found here:

[Documentation - Changing The System Time](#)

Final Thoughts
