

Nagios Log Server - Newline Character Added When Adding A Filter To A Search

Article Number: 498 | Rating: 1/5 from 1 votes | Last Updated: Thu, Dec 13, 2018 at 7:03 PM

Problem Description

You will observe that sometimes filters that are added to a search contain a newline (`\n`) character to the filter and due to this no results are found.

Explanation

In this screenshot, you can see that from an event, clicking the Magnifying Glass icon will add a filter which matches the value in the field:

Field	Action	Value	Search
<input checked="" type="checkbox"/> @timestamp	Q 🔍	2018-12-14T00:45:47.000Z	Q ▾
<input type="checkbox"/> @version	Q 🔍	1	Q ▾
<input type="checkbox"/> _id	Q 🔍	AWeqLTV1FBx7W3uoi6Z7	Q ▾
<input type="checkbox"/> _index	Q 🔍	logstash-2018.12.14	Q ▾
<input type="checkbox"/> _type	Q 🔍	syslog	Q ▾
<input type="checkbox"/> facility	Q 🔍	1	Q ▾
<input type="checkbox"/> facility_label	Q 🔍	user-level	Q ▾
<input checked="" type="checkbox"/> host	Q 🔍	10.25.13.30	Q ▾
<input type="checkbox"/> logsource	Q 🔍	tos12	Q ▾
<input checked="" type="checkbox"/> message	Q 🔍	test message (single line)	Q ▾
<input type="checkbox"/> priority	Q 🔍	13	Q ▾
<input type="checkbox"/> program	Q 🔍	root	Q ▾
<input type="checkbox"/> severity	Q 🔍	5	Q ▾
<input type="checkbox"/> severity_label	Q 🔍	Notice	Q ▾
<input type="checkbox"/> timestamp	Q 🔍	Dec 14 11:45:47	Q ▾
<input checked="" type="checkbox"/> type	Q 🔍	syslog	Q ▾

This screenshot shows the filter that was added. You can see that `\n` was added to the filter, and you can see below this causes 0 hits to be returned:

Nagios[®] LS Home Dashboards Alerting Configure Help Admin

My Default Dashboard ✕ a day ago to a fe

QUERY ▾

• "test message"

FILTERING ▾

time must ✓ ✕ field : @timestamp from : now-24h to : now

field must ✓ ✕ + field : message query : "test message (single line)\n" ← Notice \n has been added

You can edit the filter to remove \n which will result in search results being correctly returned.

The screenshot shows a configuration dialog box for a filter. It has a title bar with 'field' and a dropdown menu set to 'must'. Below that, there is a text input field containing 'message'. Underneath, the 'query' field contains the text 'est message (single line)". At the bottom of the dialog, there are two buttons: 'Save' and 'Apply'.

Resolving The Problem

What is causing this is that the original server that sent the syslog message had \n as part of the message. When you are seeing the value in the event in Nagios Log Server, \n is not being displayed, but it is there in the data.

It has been observed that:

- When syslogs are sent via TCP, \n is also sent
- When syslogs are sent via UDP, \n is NOT sent

For more information about TCP and UDP with syslog, please refer to this KB article under the section "Remote Server - Check Rsyslog Config":
