

Nagios Log Server - Resetting nagiosadmin Password

Article Number: 540 | Rating: 1/5 from 1 votes | Last Updated: Tue, Aug 9, 2016 at 2:43 AM

Problem Description

You do not know the password for the nagiosadmin account and need to reset it.

Resetting The Password

Open an SSH or direct console session to your Nagios Log Server host and execute the following command:

```
/usr/local/nagioslogserver/scripts/reset_nagiosadmin_password.sh --password newpassword
```

Note: If you would like to use special characters in your password, you should escape them with "\". For example, if you want to set your new password to be "\$new password#", then you can run:

```
/usr/local/nagioslogserver/scripts/reset_nagiosadmin_password.sh --password \$new\ password\#
```

Final Thoughts
