

CCM says unapplied changes exist, but none listed

Article Number: 563 | Rating: Unrated | Last Updated: Tue, Dec 4, 2018 at 7:31 PM

Problem Description

The Core Config Manager in Nagios XI is saying that there are unapplied changes, but none of the listed objects are marked as modified.

Resolving The Problem

Performing an Apply Config should resolve the issue.

Explanation

Deleting an object will also cause the CCM to warn you of un-applied changes, but since the objects have been deleted there is no indication in the object list of such.

Final Thoughts
