Understanding And Using Configuration Wizards In Nagios XI

This document is intended for use by Nagios Administrators that wish to get a thorough understanding of how Configuration Wizards work in Nagios XI.

[Documentation - Understanding And Using Configuration Wizards In Nagios XI](#)

This video introduces you to Configuration Wizards which are very easy to set up configuration settings for certain items you want to monitor inside your network. Watch Aaron do a step-by-step guide on how to set these up.

In this video, we continue to work our way through a Nagios XI configuration wizard to help users understand how they work and give them an example so they can easily monitor their own environment.

In this video, we focus on the last step of the configuration wizard process, specifically concerning host groups, service groups and parent child relationships.

Watch this video to learn about a way to quickly add a new element to your monitoring environment with Configuration Wizard Templates.

Final Thoughts
