

Scheduled Task Checks

Article Number: 788 | Rating: Unrated | Last Updated: Tue, Nov 28, 2017 at 7:40 PM

Scheduled Task Checks

Scheduled Task checks allow you to query the status of Windows Tasks.

Nagios Plugins

Nagios Plugins does not include a way to check scheduled tasks.

NCPA

NCPA does not include a way to check scheduled tasks.

NSClient++ via check_nt

NSClient++ via check_nt does not include a way to check scheduled tasks.

NSClient++ via check_nrpe

NSClient++ includes the check_tasksched module that allows you to check Windows Scheduled Tasks.

The check_tasksched module requires the module to be enabled in the `nsclient.ini` file, execute the following command in an Administrative command prompt:

```
cd "\Program Files\NSClient++\"
nscp settings --activate-module CheckTaskSched
nscp service --restart
```

Here is an example of making sure that a scheduled task (Test_Task) is running as per it's schedule. On the Windows machine, the tasks runs every 5 minutes. The following check will alert

Command:

```
./check_nrpe -H 10.25.14.2 -c check_tasksched -a "filter=title eq 'Test_Task'" 'critical=most_recent_run_time < -5m' empty-state=critical
```

Output:

```
OK: All tasks are ok|'Test_Task_exit_code'=0;0 'Test_Task_most_recent_run_time'=1511910303;0;1511910278
```

WMI

Check WMI Plus does not include a way to check scheduled tasks.

SNMP

SNMP does not include a way to check scheduled tasks.

Final Thoughts
