

Nagios XI - Installing Latest SourceGuardian Loaders

Article Number: 816 | Rating: Unrated | Last Updated: Tue, Feb 9, 2021 at 11:11 AM

Overview

This KB article explains how to install the latest SourceGuardian loaders that Nagios XI uses with PHP.

Install

Establish a terminal session to your Nagios XI server as the root user and execute the following commands:

```
cd /tmp
rm -rf nagiosxi xi*
wget https://assets.nagios.com/downloads/nagiosxi/xi-latest.tar.gz
tar xzf xi-latest.tar.gz
cd nagiosxi
./init.sh
sed -i '/^PHP script/d' xi-sys.cfg
sed -i '/^1)/d' xi-sys.cfg
sed -i '/^2)/d' xi-sys.cfg
sed -i '/^3)/d' xi-sys.cfg
./install-sourceguardian-extension.sh
```

Once you've completed these steps you will need to restart the `crond` and `httpd` services:

RHEL 7 | CentOS 7 | Oracle Linux 7

```
systemctl restart crond.service
systemctl restart httpd.service
```

Debian | Ubuntu 16/18

```
systemctl restart cron.service
systemctl restart apache2.service
```

This completes the steps required to upgrade the SourceGuardian loaders.

Final Thoughts
